DETAILED ACTION

Allowable Subject Matter

1. Claims 1-31 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The rejections of claims 1-31 have been withdrawn in light of applicant's argument of unexpected and unobvious properties and the data of record in the present specification. Table 1 found on page 16 of the present specification shows the claimed compound, i.e., 2-methylene-19-nor-20(S)-25-methyl-1 α -hydroxycalciferol, like 1 α ,25-dihydroxyvitamin D₃, caused bone resorption only at high doses unlike 2-methylene-19-nor-20(S)-25-hydroxy-1 α -hydroxycalciferol. In addition, Figure 3 shows 2-methylene-19-nor-20(S)-25-methyl-1 α -hydroxycalciferol was more effective on intestinal calcium absorption than 1 α ,25-dihydroxyvitamin D₃. Thus, the claimed compound shows selectivity for intestinal calcium transport activity. Based on said showing, the claimed compound would not have been obvious in light of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
